

EVIPRO
SCIENCE LAB

ANTI-AGE
HYDRO-LIPID SYSTEM

Gold collection

**ANTI-AGE
GOLD COLLECTION
BY EVIPRO SCIENCE LAB**

no analogues in the world

- new approach to ensure comprehensive health and youthfulness of the skin of the face and decollete
- revolutionary alternative to injection procedures
- effective at any age with any skin type

CONCEPTUAL UNIQUENESS OF FORMULAS

REVITALIZATION BIOMIMETIC MULTIPEPTIDE COMPLEX

Latest generation peptides with improved chemical formula and bioavailability. Confirmed clinical base with Anti-Age results from TOP international manufacturers:

Lubrizol (Spain), Basf (Germany), Seppic (France), Croda (England), Evonik (Germany), Gobiotics (Netherlands), Solabia (Germany), Naturatec (France), Nouryon (Netherlands)

REVOLUTIONARY AURUM NM (NANO-MESH) TECHNOLOGY

Liquid gold particles Nano-Mesh technology provide exceptional non-invasive intercellular lifting effect and prevent biological aging of the skin. Improve tissue egeneration, reduce inflammation, activate metabolic processes. The small size of the particles is a high-technological biocompatible actives conductor.

ANTIBACTERIAL SMART Ag (SILVER PARTICLES)

Provide long-lasting antibacterial effect, which minimizes inflammatory processes and redness on the skin, maintaining its natural protective barrier from external aggressive environmental factors. The small size of the particles is a high-technological biocompatible actives conductor.

COMPLEX OF DEEP HYDRATION OF THE DERMIS

The unique BIOACTIVE ANTI-AGE WATER in synergy with a multi-molecular hyaluronic acid complex that works throughout the entire depth of the dermis, enhanced by the powerful action of premium natural moisturizing ingredients.

**Formula matrix based on
«BIOACTIVE ANTI-AGE
WATER» (DDW 50PPM)**

This water accelerates the process of cell division rejuvenation, accelerates metabolic processes and enhances protective properties. Launches the restoration of lost or impaired functions of healthy skin.

ADVANTAGES

- Scientific and medical approach to the development of cosmetic formulas
- A comprehensive solution to problems with age-related skin imperfections (flabbiness, sagging, expression and static wrinkles, dryness, pigmentation).
- High concentrations of active ingredients
- Biomimetic components – having a high degree of affinity for the structural elements of all layers of the skin
- The use of active delivery systems in the form of SMART particles of such precious metals as gold and silver
- Natural balanced composition. We exclude all popular ingredients from the petrochemical industry, used by the overwhelming majority of the world's cosmetics manufacturers, including "professional" ones. Such components lack biocompatibility and usefulness. And the potential long-term negative effects are much worse than the visible immediate effect during use.

ANTI-AGE HYDRO-LIPID SYSTEM

is a two-component REJUVENATION set

ANTI-AGE HYDRO-LIPID SYSTEM created to provide a unique effect of nutrition, hydration and optimal functioning of all layers of the skin, maintaining youth and removing signs of aging.

- New **EXCLUSIVE** cosmetic product
- Real effect **NO COMPROMISE**

The combined use of the ANTI-AGE HYDRO-LIPID SYSTEM complex ensures high efficiency of the biologically active components of the formula.

CREAM+SERUM SYNERGY

Activator Lipid Silver Cream in combination with Accelerator Hydro Gold Serum forms a balanced hydro-lipid (serum + cream) system:

- Provides a high concentration of unique valuable components of cream + serum, revealing their potential.
- Maintains the hydro-lipid balance of the skin at an optimal level.
- Has the highest throughput capability. Corresponding to the protective hydro-lipidic mantle of the skin and in synergy with silver and gold SMART particles, it successfully transports unique and valuable components into the deep layers of the skin in a stable state and in ideal concentration.

The hydro-lipid complex ANTI-AGE HYDRO-LIPID SYSTEM is universal and suitable for all skin types.

The system allows to select a comfortable proportion of lipid (cream) and water (serum) parts of the product, and at the same time provides a comprehensive healing and rejuvenating effect.

INDICATIONS FOR USE

Age-related changes, loss of skin tone and elasticity, transepidermal moisture loss (TEL), dull skin color, redness, acne proneness, increased sensitivity.

FUNCTIONAL ACTION:

- Cellular rejuvenation and reduction of visual signs of aging;
- Combined muscle relaxant effect on facial muscles without disturbing live facial expressions;
- Non-invasive intercellular lifting with liquid gold particles using Aurum NM (Nano-Mesh) technology;
- Reduction of swelling;
- Slowing down the aging process, restoring lost functions of skin cells;
- Deep nutrition and hydration;
- Optimization of the work of structural elements of all skin layers;
- Maintaining the hydro-lipid balance of the skin;
- Ensuring basic daily skin health;
- Even skin tone and radiance;
- Protection against a wide range of bacterial strains;
- Lightening of hyperpigmented areas of the skin;
- Light toning effect for fair skin.

RESULT:

Your skin becomes maximally healthy, smooth, hydrated, elastic and radiant.

ACCELERATOR HYDRO GOLD SERUM

A unique concentrate, a catalyst for deep rejuvenation of the ANTI-AGE HYDRO-LIPID SYSTEM complex.

The serum is made using a special innovative technology based on bioactive anti-aging water "BIOACTIVE ANTI-AGE WATER" (DDW-50ppm), liquid gold and a highly effective biomimetic complex of peptides.

Pronounced non-invasive lifting effect. Smoothing wrinkles, increasing skin density and turgor. Nutrition and long-lasting natural hydration of all layers of the skin.

INGREDIENTS: Aqua (DDW-50ppm), Mu-conotoxin CnCIII, Aqua, Butylene Glycol, Acetyl Tetrapeptide-5, Aqua, Acetyl Octapeptide-3, Caprylyl Glycol, Glycerin, Maltodextrin, Pinus Strobus Bark Extract, Pentylene Glycol, Biosaccharide Gum-1, Vaccinium myrtillus (bilberry) fruit water, Aqua, Acetyl Tetrapeptide-40, Caprylyl Glycol, Aqua, Acetyl Tetrapeptide-2, Caprylyl Glycol, Copper Tripeptide-1, Maltose, Agave Tequilana Leaf Extract, Sodium Benzoate, Potassium Sorbate, Cellulose Gum, Xanthan Gum, Inulin, Cellulose, Glucose, Fructose, Sodium Hyaluronate (3-8 kDa, 5-10 kDa, 1000-1500 kDa), Panthenol, Hydroxyethyl Urea, Hamamelis Virginiana Leaf Extract, Centaurea Cyanus Flower Extract, Levulinic Acid, Sodium Levulinate, Colloidal Gold.

ACCELERATOR HYDRO GOLD SERUM

REVITALIZATION MULTYPEPTIDE COMPLEX

SNAP-8™ PEPTIDE

Block contraction of facial muscles, providing a relaxing and lifting effect. Alternative to botulinum toxin.

XEP™-018

UPLEVITY™

Stimulate the accelerated synthesis of collagen and elastin.

BORÉALINE® AURORA

Suppression of melanin synthesis, porcelain skin effect.

TELANGYN™

Soothe sensitive skin, relieve redness and inflammation, evens out tone.

EYESERYL®

Reduction of swelling and “bags” under the eyes, elimination of dark circles.

APEPCTP®-10

Stimulate the synthesis of epidermal lipids, enhance tissue regeneration and damage healing. Suppress scar formation.

ACCELERATOR HYDRO GOLD SERUM

COMPLEX OF DEEP HYDRATION OF THE DERMIS

**BIOACTIVE ANTI-AGE WATER
(DDW-50ppm)**

**Hyaluronic acid with a ultra-low
molecular weight (3-8 kDa)**

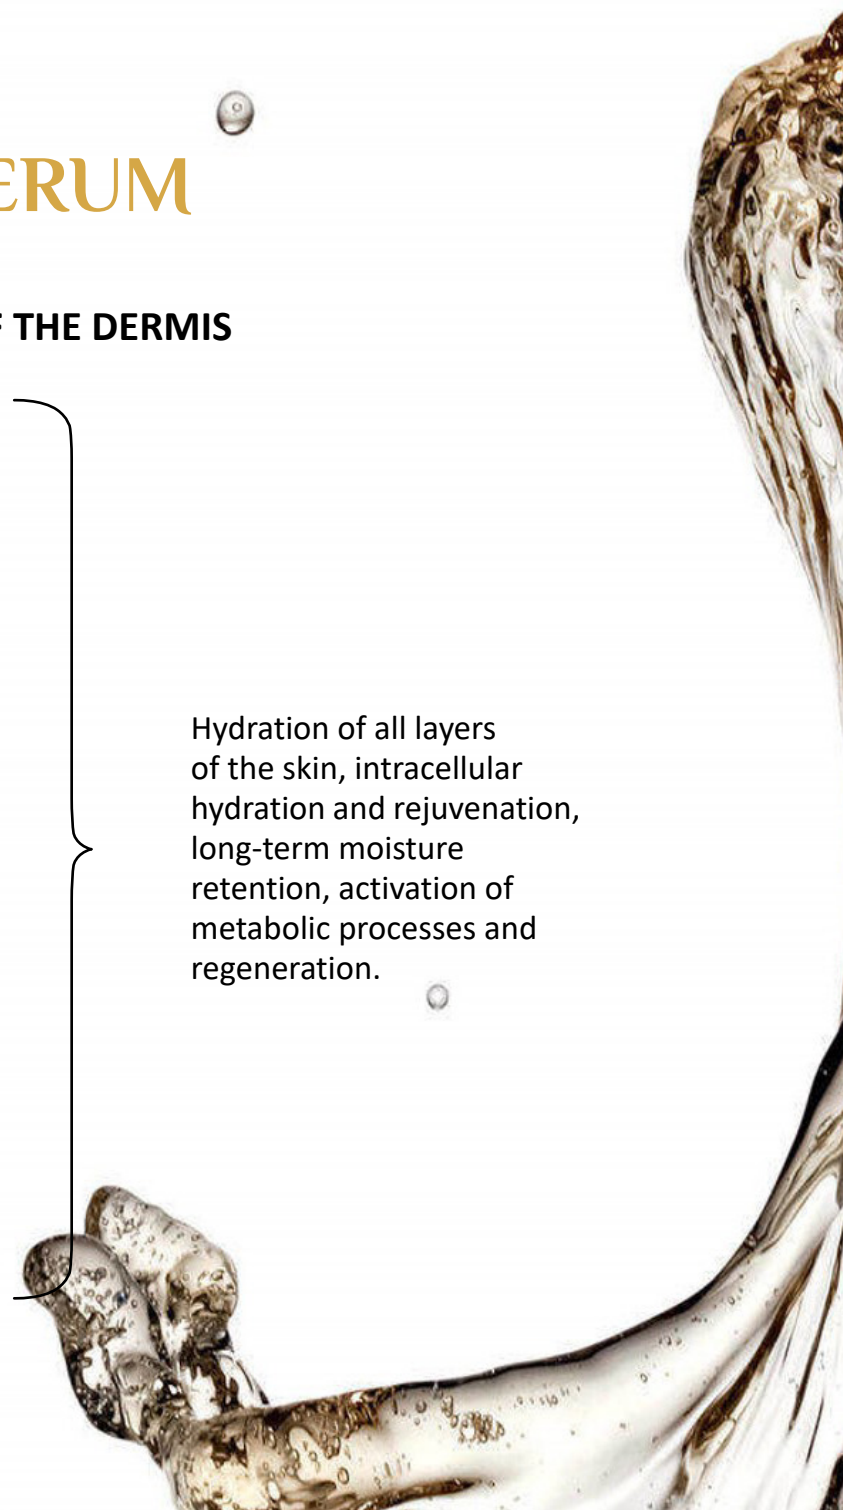

**Hyaluronic acid with a super-low
molecular weight (<10 kDa)**

**Hyaluronic acid with a high
molecular weight (1000 – 1500 kDa)**

Hydrovance

Fucogel

Hydration of all layers
of the skin, intracellular
hydration and rejuvenation,
long-term moisture
retention, activation of
metabolic processes and
regeneration.

ACCELERATOR HYDRO GOLD SERUM

REVOLUTIONARY LIFTING-COMPLEX

Liquid gold (Aurum NM lifting particles)

Lifting effect of prolonged action.

Nectar of the legendary blue agave

Quick visual lifting effect.

ACTIVATOR LIPID SILVER CREAM

Powerful nutrition and hydration of the skin for comprehensive health and rejuvenation

A unique formula of a natural and biocompatible cream based on bioactive anti-aging water "BIOACTIVE ANTI-AGE WATER" (DDW-50ppm) and a concentrate of biomimetic peptides.

Activate the revitalization of skin cells. Provide smoothness and radiance of the skin, creating the effect of "premium silk".

An important component of the cream is SMART silver particles providing an antibacterial effect, minimizing inflammatory processes and redness on the skin, maintaining its natural protective barrier from external aggressive environmental factors.

INGREDIENTS: Aqua (DDW-50ppm), Cetearyl Alcohol, Glyceryl Stearate, Potassium Palmitoyl Hydrolyzed Wheat Protein, Persea Gratissima (Avocado) Oil, Argania Spinosa Kernel Oil, Hydrogenated Ethylhexyl Oliviate, Hydrogenated Olive Oil Unsaponifiables, Hydroxyethyl Urea, Acetylgarginyltryptophyl Diphenylglycine, Aqua, Acetyl Octapeptide-3, Caprylyl Glycol, Xylitylglucoside, Anhydroxylitol, Xylitol, Aqua, Dextran Trifluoroacetyl Tripeptide-2, Pentylene Glycol, Glycerin, Biosaccharide Gum-1, Aloe Vera Gel, Palmitoyl Glycine, Tocopherol, Hydrolyzed Wheat Protein, Sodium Benzoate, Potassium Sorbate, Butyrospermum Parkii Shea Butter, Sodium Hyaluronate (100-500 kDa), Cellulose Gum, Xanthan Gum, Inulin, Cellulose, Glucose, Fructose, Soy Lecithin, Oryza Sativa Starch, Corn Starch, Levulinic Acid, Sodium Levulinate, Colloidal Silver.

ACTIVATOR LIPID SILVER CREAM

REVITALIZATION MULTYPEPTIDE COMPLEX

SNAP-8™ PEPTIDE

Blocks contraction of facial muscles, providing a relaxing and lifting effect. Alternative to botulinum toxin.

RELISTASE™

Inhibit the activity of elastase and collagenase. Stimulate the synthesis of type 1 collagen.

TIMECODE™

PROGELINE™

Suppress the synthesis of the aging protein - progerin, slowing down cellular aging.

ACTIVATOR LIPID SILVER CREAM

COMPLEX OF DEEP HYDRATION OF THE DERMIS

**BIOACTIVE ANTI-AGE WATER
(DDW-50ppm)**

**Hyaluronic acid with a low
molecular weight (100-500 kDa)**

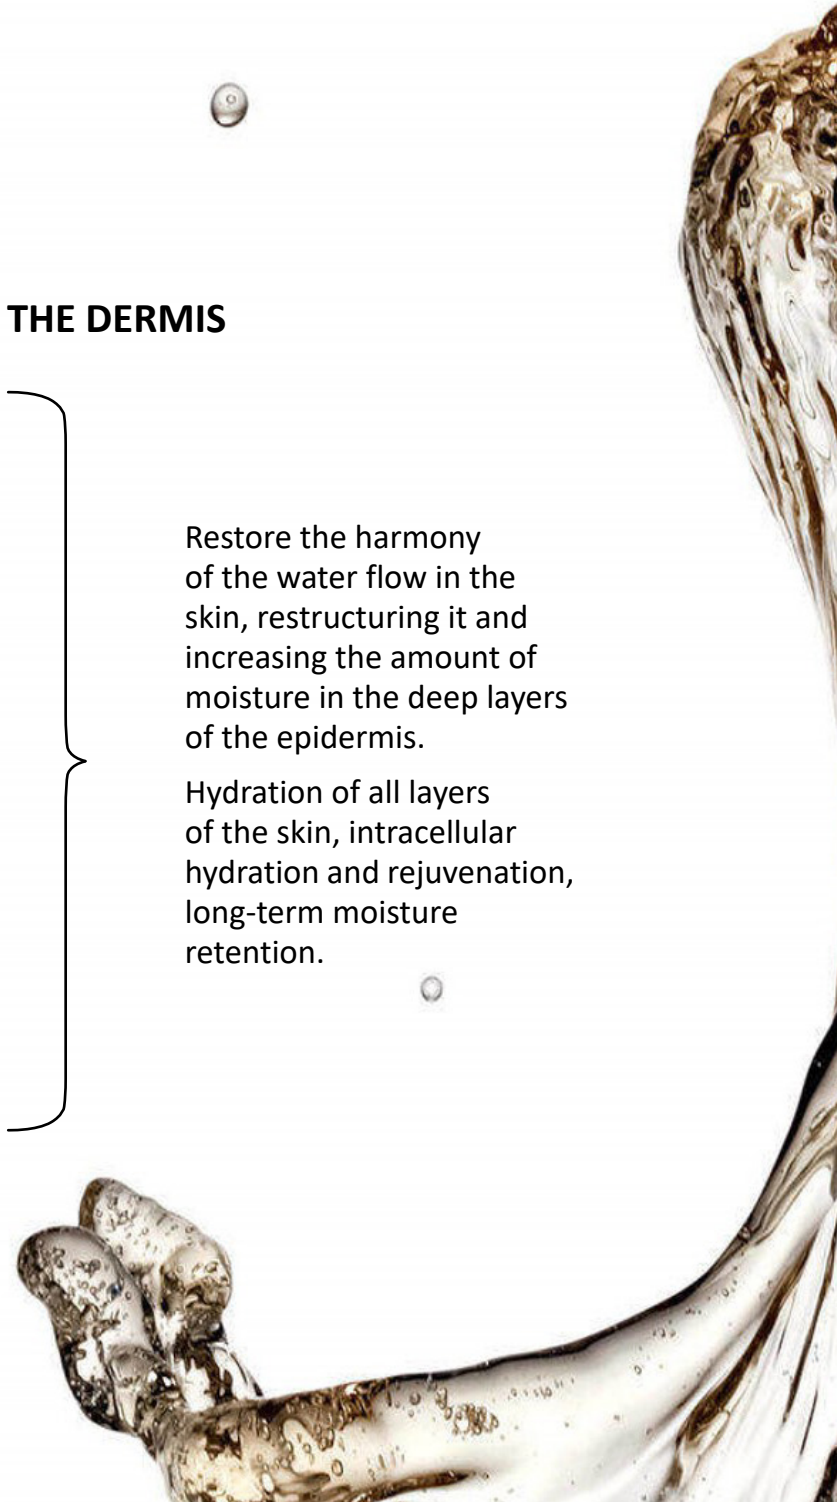

Vitamin E

Wheat proteins

AQUAXYL

Restore the harmony of the water flow in the skin, restructuring it and increasing the amount of moisture in the deep layers of the epidermis.

Hydration of all layers of the skin, intracellular hydration and rejuvenation, long-term moisture retention.

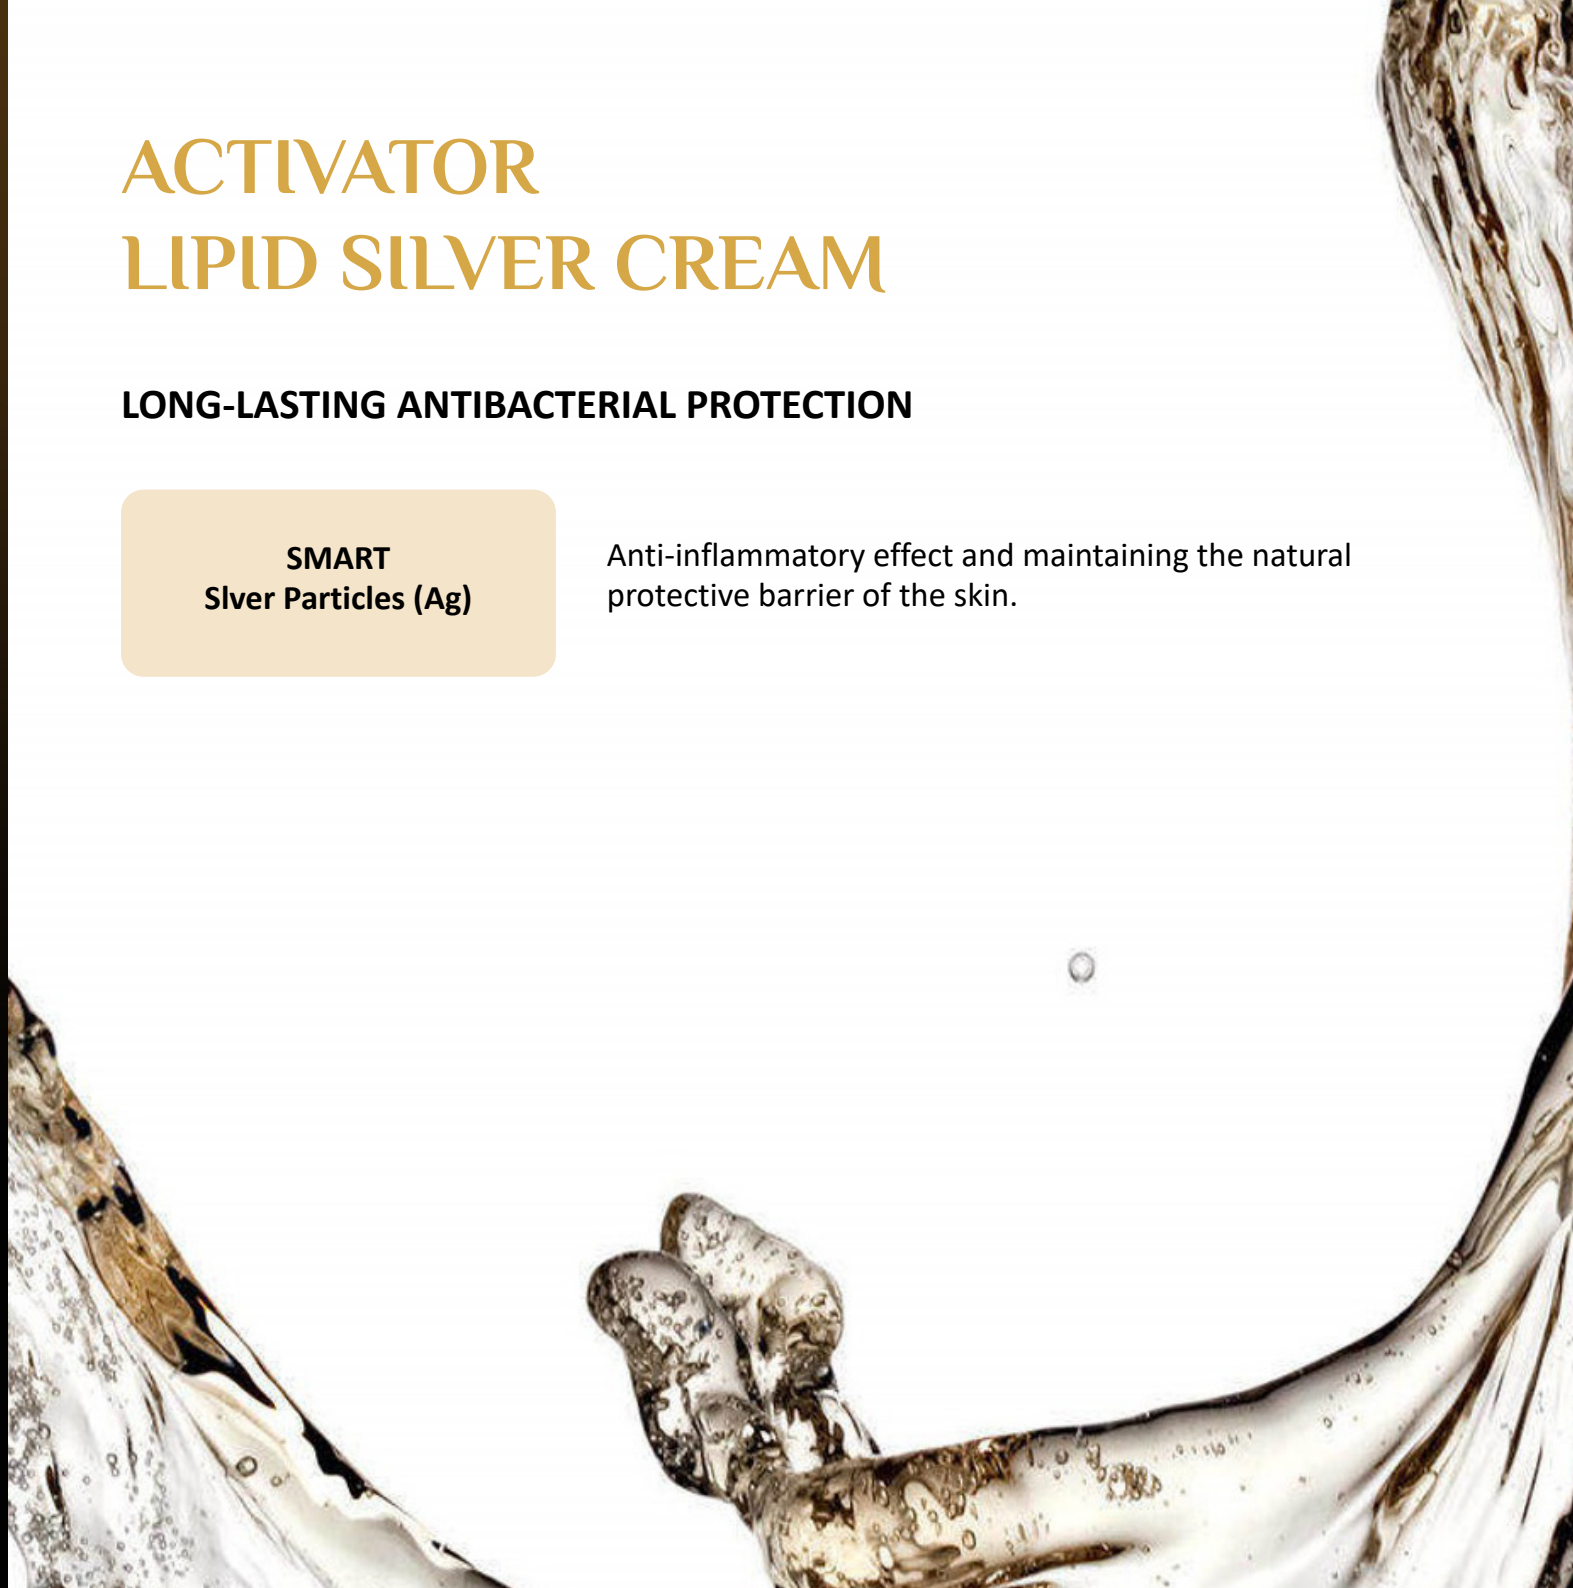

ACTIVATOR LIPID SILVER CREAM

LONG-LASTING ANTIBACTERIAL PROTECTION

**SMART
Silver Particles (Ag)**

Anti-inflammatory effect and maintaining the natural protective barrier of the skin.

COMPLEX APPROACH

ANTI-AGE HYDRO-LIPID SYSTEM provides a balanced complex to launch a program of regeneration and tissue rejuvenation at the cellular level.

The skin health and body deficiencies are different for each specific person at a specific time. The condition of the skin depends on many factors: nutrition, immunity, hormone levels and their cyclic fluctuations, genetic basis, the state of health of the whole organism, the presence of chronic and acute diseases, the presence of basic dermatological problems, etc.

The products of the complex can be used independently and in combination with other ANTI-AGE Collection products by the EVIPRO laboratory, which guarantees complete proper care and optimal functioning of all layers of the skin to achieve the stated results.

IMPORTANT!

Do not use other cosmetics during the course of the hydro-lipid system. Residues of other products both on the surface of the skin and in its deep layers, often containing ingredients foreign to our body, can interfere with the penetration of natural biomimetic components into the deep layers of the skin and limit the effectiveness of ANTI-AGE HYDRO-LIPID SYSTEM.

RECOMMENDED COURSE DURATION

Deep revitalization – 4 weeks,

when used once a day (at night). It is possible to extend the course up to 8 weeks, taking into account the individual skin condition.

Express rejuvenation – 2 weeks,

Express rejuvenation – 2 weeks

Recommended for people over 30 years old.

COMPREHENSIVE SKIN HEALTH AND YOUTH

ANTI-AGE HYDRO-LIPID SYSTEM is the best comprehensive solution for complete rejuvenation of the skin of the face and decollete.

- More than 15 super effective ingredients
- Large scientific evidence base for the effectiveness of each ingredient

RESULT:

Your skin receives everything it needs in effective concentration after the first application:

- Really visible result of healthy and glowing skin after the first days of use
- Course use results with a noticeable reduction in signs of aging
- Long-term positive effect

CONTAINS ALL THAT YOU NEED

Because by influencing only one or two functions of skin cells, it is impossible to obtain an appropriate long-term result.

USE IN BEAUTY SALON CARE

The use of hardware methods with the ANTI-AGE HYDRO-LIPID SYSTEM, such as microcurrents, low-level laser therapy (LLLT), magnetic therapy and a number of others, allows to more fully reveal the potential of the system and helps to significantly (!) increase the speed of achieving the effect and its intensity.

**BIOMIMETIC
MULTIPEPTIDE
COMPLEX**

UPLEVITY™

A new peptide created to combat the unwanted effects of elasticity loss and density of the skin, by increasing the level of natural elements, which maintain the level of properly assembled collagen and elastin fibers, and promote adhesion between cells and the extracellular matrix.

RESISTANCE TO GRAVITY

- Activates FBLN5 and LOXL1 promoters
- Increases the level of FBLN5 and LOXL proteins
- Increases elastin synthesis
- Activates genes associated with focal contacts and collagen synthesis, especially inducing the synthesis of type I collagen.

RESULTS

- The skin activates its firmness and flexibility
- Improving skin tone and resisting age-related changes
- Restores and maintains supporting functions of dermis
- Facial architecture: the main contours are outlined and tightened
- Additional help in resistance to gravity
- Enhances the production of elastin and collagen, reduces skin laxity and sagging

Telangyn™

Telangyn™ combats unwanted effects caused by inflammatory processes such as skin redness, dilated capillaries, tissue degradation, as well as post-inflammatory hyperpigmentation and dull skin.

Tetrapeptide that reduces the appearance of facial redness and visible capillary networks caused by an excessive inflammatory response. Telangyn™ reduces the release of interleukins (IL-6 and IL-8) induced by 37-amino acid peptide (LL-37) by cathelicidin that is released in excess in skin disorders such as erythema.

- Inhibits collagenase activity, reducing collagen degradation
- Provides photoprotection while maintaining cell viability
- Reduces skin hyperpigmentation, improving skin tone uniformity and its appearance
- Combats erythema, skin redness and roughness

Relistase™

Relistase™ was developed to prevent sagging, laxity and loss of firmness in skin. Relistase™ increases the density and stability of skin, especially mature skin, which becomes less elastic and unable to withstand any deformation.

- Increases elasticity and density
- Elastin protection
- Inhibits elastase activity
- Collagen Boost
- Stimulation of collagen synthesis (type I)

PROGELINE™

Concept: reverse aging. Preserves the architecture of cell nucleus. Increases cell activity to the level of young cells.

HIGH EFFICIENCY OF PEPTIDE TECHNOLOGY

- 3-amino acid peptide – Elafin biomimetic
- Reduces the production of toxic aging protein – progerin
- Delays cell aging to increase cell lifespan
- Stimulates sirtuins (longevity proteins)

VISUAL EFFECTS AND RESULTS

- V-shaped face without surgery
- Remodels the oval of the face, tightens it and gives an anti-gravity effect
- Reduces the appearance of wrinkles
- Improves skin firmness and elasticity

PROGELINE™

Progerin - a new biomarker of cellular aging

- Progerin is a protein that is expressed in skin cells (fibroblasts and keratinocytes) at any age, but accumulates over time from the age of 30 (3% per year)
- The accumulation of progerin causes accelerated early aging by changing the structure of the nucleus. This was established in the study of the disease PROGERIA (Hutchinson-Gilford Syndrome-HGS), which is characterized by premature aging of young children due to abnormally high levels of progerin in the cells (7 times more than normal)

Sirtuin- longevity proteins

- >90% of cellular reactive oxygen species (ROS) are produced by mitochondria during energy production. Sirtuin-3 (SIRT-3) reduces ROS levels in mitochondria by increasing the activity of antioxidants such as superoxide dismutase 2 (SOD2), reducing glutathione, thereby promoting ROS scavenging.

RESULT

Activation of sirtuin-3 increases cell lifespan

Snap-8™ peptide

Non-invasive alternative to botulinum toxin injections.

Inhibiting the formation of the SNARE complex is an effective strategy to reduce the release of neurotransmitters and thereby regulate muscle contraction:

BOTULISM NEUROTOXIN

- Cleavage of SNARE complex proteins
- Irreversible inhibition of the SNARE complex
- Muscle paralysis and negative side effects

BIOMIMETIC INHIBITORY PEPTIDE

- Cleavage of SNARE complex proteins
- Irreversible inhibition of the SNARE complex
- Muscle paralysis and negative side effects

Snap-8™ Octapeptide is designed as an analogue of the N-terminal of SNAP-25 and competes with this protein for a place in the SNARE complex, thereby destabilizing the SNARE complex and reducing the release of neurotransmitters.

Snap-8™ CONCLUSIONS:

EFFECTIVENESS IN VITRO

↓ Release of glutamate neuromodulator - 43%
Inhibition of SNARE complex formation

EFFECTIVENESS IN VIVO

↓ maximum depth of the largest wrinkles up to 72% after 14 days

- Less wrinkles caused by muscle contraction
- Non-invasive alternative to botulinum toxin injections
- Relaxation of fine lines and wrinkles for smoother skin
- Slow down the transformation of fine lines into wrinkles
- Smooth existing wrinkles and prevent the appearance of new ones

EYESERYL[®] peptide solution

An excellent alternative to blepharoplasty

Tetrapeptide that helps to improve the eye contour by targeting the reduction of key factors in the formation of bags and dark circles under the eyes:

- Reduced glycation activity
- Inhibition of vascular permeability
- Destruction of bilirubin
- Reduced lipid accumulation

IN RESULTS

Getting rid of the effect of “tired” eyes. Youth, freshness and attractiveness.

ApepCTP[®]-10 (GHK-CU)

Copper tripeptide is a signal peptide consisting of 3 amino acids - glycine, histidine and lysine - structurally combined with copper.

At the moment, this is one of the most multifunctional and effective peptides. Due to this, it is widely used in the formulations of cosmetic products aimed at solving the problems of aging skin and restoring skin after photodamage. Copper tripeptide is an important regulator of the regeneration process in many tissues and organs, including the skin. It is known that the natural level of the tripeptide decreases with age, resulting in a deterioration in the regenerative abilities of the tissue.

ApepCTP[®]-10 (GHK-CU)

The biochemical feature of copper tripeptide is its small size, as a result, it easily moves in the intercellular space and penetrates cell membrane receptors. This peptide is able to penetrate the skin and reach fibroblasts contained in connective tissues.

- Stimulation of the collagen synthesis (type I and type III), elastin, laminin (responsible for cell adhesion) in the intercellular matrix of the skin promotes accelerated healing and tissue restoration, reduction of deep wrinkles and smoothing of fine wrinkles.
- GHK-Cu not only stimulates the synthesis of new proteins of the intercellular matrix, it also activates the destruction of large collagen aggregates that disrupt the normal structure of the matrix. Stimulates the proliferation of skin keratinocytes. In total, all these processes lead to the restoration of the normal structure of the skin, improving its elasticity and appearance.
- Activation of the synthesis of decorin (a proteoglycan also involved in regulating collagen synthesis) promotes the synthesis of “correct” skin fibers, without thickening, and reduces the risk of scar formation.
- Together with glycine, copper tripeptide causes an influx of macrophages and increases the levels of antioxidant and anti-inflammatory enzymes, reducing the level of inflammatory cytokines. As a result, regeneration processes are launched, inflammatory reactions are suppressed, and skin sensitivity to stress and ALLERGENIC factors decreases.
- Stimulation of the synthesis of moisture-retaining molecules of the dermis - glycosaminoglycans;
- Correction of skin pigmentation, especially associated with age-related changes.

XEP™-018

XEP™-018 is Mu-conotoxin, a biomimetic peptide obtained from the venom of the sea snail (cone snail), one of the most dangerous inhabitants of our planet. Today it is one of the most active botulomimetic peptides.

- XEP™-018 relaxes the muscle, but does not block it completely, which allows to get a natural result.

In a dose-dependent manner, mu-conotoxin acts specifically on the neuromuscular channel Nav1.4, blocking the electrical impulse that causes muscle contraction. As a result, the muscle relaxes, facial wrinkles are smoothed out, while natural facial expressions and sensitivity are preserved.

- 5% of the substance remains in neuromuscular signal contacts

XEP™-018

In nature, the cone snail toxin is considered one of the most powerful poisons, having an immediate nerve-paralytic and anesthetic effect.

SAFETY, TOXICOLOGY AND SKIN IRRITATION STUDIES WERE CONDUCTED IN A PHARMACEUTICAL LABORATORIES:

- does not cause skin irritation
- does not cause eye irritation
- non-cytotoxic and non-mutagenic
- non-phototoxic
- hypoallergenic and not classified as a sensitizer

XEP™-018 BENEFITS

- High stability
- Narrow focus of action
- Deeper penetration into the skin compared to linear peptides

A close-up, low-key photograph of a woman's face. Her eyes are closed, and her hands are gently touching her cheeks, suggesting a sense of relaxation or self-care. The lighting is soft and focused on her skin, creating a warm, intimate atmosphere. The background is dark, making the subject stand out.

**REVOLUTIONARY
LIFTING-
COMPLEX**

LIQUID GOLD (AURUM NM LIFTING PARTICLES)

The know-how of EVIPRO Laboratory is the transformation of gold particles using Aurum NM (Nano-Mesh) technology. The result is exceptional non-invasive intercellular lifting effect.

The effect of gold particles is well known and studied:

- Accelerate the process of epidermal cell restoration
- Slow down the aging process
- Improve tone and overall skin health
- Heal by reducing the acidity of the skin
- Act as a “catalyst”, improving the effect of other ingredients
- Accelerate blood microcirculation

Gold particles in combination with hyaluronic acid work wonders on aging skin - saturate skin cells with oxygen and improve metabolism, promote the absorption of other beneficial components, cleanse toxins, normalize pH balance, moisturize and rejuvenate.

GOSULIN AGAVE

Gosulin Agave is a unique sensory film-forming agent obtained naturally and sustainably from the nectar of the legendary blue agave (botanical name: Agave Tequiliana).

BASIC PROPERTIES:

- Gosulin Agave reduces shine on oily skin. The effect is immediate and long-lasting. This is the ideal solution to avoid the use of occlusive cosmetics.
- GOSULIN AGAVE - lifting effect and reduction of wrinkles. The comfortable network of polysaccharides that Gosulin Agave forms on the skin has both a rapid visible lifting effect and wrinkle filling and smoothing characteristics. The reduction of wrinkles is objectively noticeable within 5 minutes after application. Noticeable visual effect.

Only the plants that are at least 6 years old are used to harvest Agave Tequilana. The large leaves are cut off from the short stem of the agave, leaving its core (pinya). Agave Tequilana converts solar energy into polysaccharides: Inulin / Inulin

**COMPLEX
OF DEEP HYDRATION
OF THE DERMIS**

HYALURONIC ACID WITH A HIGH MOLECULAR WEIGHT 1000-1500 KDA

This hyaluronic acid well moisturizes the top layer of the skin, forms a breathable protective film that prevents the loss of moisture already present in the skin layers. It does not have the ability to smooth out wrinkles from the inside, but it still provides a visual smoothing effect while it is on the surface of the skin. It also has an antibacterial effect and promotes wound healing.

HYALURONIC ACID WITH A MOLECULAR WEIGHT 100-500 KDA

Low molecular weight hyaluronic acid 100,000 Da

Medium chain hyaluronic acid with a size of 100-500 kDa is considered the most bioavailable and is best absorbed by the skin. While high molecular weight isomers form films, and low molecular weight isomers penetrate deeply into the skin, filling the intercellular space, medium chain hyaluronates work in the upper layers of the skin, penetrating the epidermis, optimally revealing their moisturizing potential and helping to restore the skin's natural immune system. Medium chain hyaluronic acid has an antimicrobial effect and also accelerates the healing process of wounds.

Medium chain hyaluronates release antibacterial peptides B-defensins2 (DEFB2), which stimulates the migration and rapid proliferation of keratinocytes and fibroblasts.

HYALURONIC ACID WITH A SUPER-LOW MOLECULAR WEIGHT 10 KDA

The super-low-molecular component revolutionized cosmetics industry. The Japanese, whose cosmetics are aimed primarily at moisturizing the skin and preserving moisture reserves in its intercellular matrix, were the first to use it.

The deep hydration and effectiveness of the component are in demand in the treatment of acne and various dermatological diseases. It facilitates skin healing after peelings of different depths.

HYALURONIC ACID WITH A ULTRA-LOW MOLECULAR WEIGHT 3-8 KDA

Highly active sodium hyaluronate with extremely low molecular weight. It has the highest penetration coefficient into the dermis and multidirectional biological activity.

ECOCERT certified Oligo Hyaluronic Acid with a molecular weight of 3kDa-8kDa is able to penetrate into the deep layers of the skin and has multidirectional biological activity:

- Transdermal absorption
- Deep hydration
- Repairing damaged cells
- Antioxidant effect, neutralization of free radicals
- Preservation of the main characteristics of young and healthy skin: firmness, elasticity and tone

A vertical strip on the left side of the page shows a close-up, microscopic view of numerous water droplets of various sizes. The droplets are clear and glistening, with some showing highlights from light. They are set against a light blue, slightly blurred background, creating a fresh and hydrating aesthetic.

HYALURONIC ACID WITH A ULTRA-LOW MOLECULAR WEIGHT 3-8 KDA

Oligo HA can penetrate the skin, moisturizing the epidermis and dermis. High molecular weight HA also has good moisturizing properties, forming a film on the surface of the skin. When low molecular weight hyaluronic acid and high molecular weight haluronic acid are used together in a formulation, a synergistic effect is observed.

EFFECTIVENESS IN VIVO

1. Increased skin elasticity

Skin elasticity increased by 4.6%, 5.2% and 6.1% after applying Oligo HA cream at 15, 30 and 60 days, respectively.

2. Strengthening the skin barrier

Skin thickness increased by 8.3% according to the data of use Oligo HA cream during 60 days.

3. Reducing skin wrinkles

Skin wrinkle depth (Sa) decreased by 16.0%, 20.3% and 25.6% after applying Oligo HA cream at 15, 30 and 60 days, respectively.

4. Clinical trial

The reduction in wrinkle depth was also confirmed by a dermatological assessment after 30 days of using a cream containing Oligo HA. There was an obvious reduction in wrinkles in 40% of volunteers by dermatological evaluation after using Oligo HA cream at 30 days. After 60 days, 60% of volunteers recorded a clear reduction in wrinkles.

BIOACTIVE ANTI-AGE WATER (DDW-50PPM)

It is a water with a reduced content of heavy isotopes (deuterium) at a concentration of 50 ppm.

Research by scientists over the past 20 years has proven that water with a reduced deuterium content is healthy water. An environment with a reduced deuterium content increases the resistance of cells and the entire organism to damaging effects of various natures, including: carcinogenic substances, chemical poisons, radiation. Even a small change in the content of heavy water in the blood plasma increases the body's defenses and improves the functioning of various enzymatic systems. Cell division (rejuvenation) occurs 2 times faster compared to ordinary water!

- Has an anti-aging effect ***(studies)***
- Increases the body's overall resistance to negative external influences in a metropolis ***(studies)***
- Protects against radiation exposure during frequent business trips and airplane flights
- Increases resistance to psychological stress ***(research results by Oxford university)***
- The highest degree of purity (less harmful impurities such as Pb, Hg, Mo, Cr, etc.) among drinking waters ***(water analysis, Japan)***
- The only water in Russia in which the content of heavy water (deuterium) is reduced by 3 times compared to natural water ***(protocol)***

** The unique properties of water with a reduced deuterium content have been proven by more than 200 scientific studies by the scientists from different countries published over the past 20 years.*

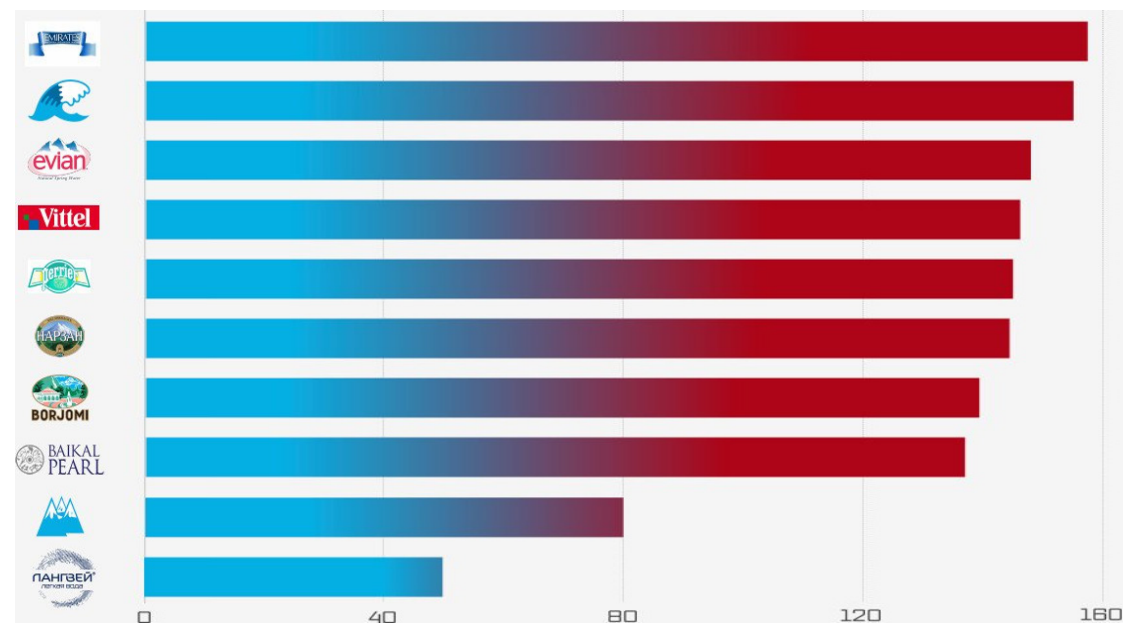

BIOACTIVE ANTI-AGE WATER (DDW-50PPM)

A reduced deuterium content in water stimulates life processes at the cellular level.

This biologically active water, purified at the molecular level, has a noticeable immunomodulatory, anti-inflammatory and rejuvenating effect. Normalizes metabolic processes, improving the working conditions of cells of various organs and systems. Regular water, usually found in natural conditions of human activity, has a higher level of deuterium. With such water chemical processes occur much more slowly.

DEUTERIUM CONTENT IN NATURAL AND BOTTLED WATERS

**LONG-LASTING
ANTIBACTERIAL
PROTECTION**

SMART SILVER PARTICLES (AG)

UNIQUE functional action!

- Destroy about 650 different pathogens of all major types: bacteria, fungi and yeast, viruses, protozoa.

IN RESULTS:

Minimize inflammatory processes and redness on the skin, maintaining its natural protective barrier from external aggressive environmental factors.

- Smart particles are an effective vehicle for the delivery of active components to target cells, thereby exponentially enhancing their action.

Prolonged antiseptic effect

Does not affect the friendly ecosystem, selectively suppresses bacteria, viruses, fungi

Ag as a microelement is part of body tissues and is in symbiosis with both human cells and friendly flora

No resistance in pathogenic microorganisms
